

Marking and Feedback

Structural Integrity:

The box must be stable and able to stand on its own without collapsing.

Integrated Lid:

The box must have an integrated lid that opens and closes smoothly.

Size Consistency:

The dimensions of the box must adhere to the specifications provided in the user stories.

Design and Decoration:

The box must be decorated according to the design requirements specified in the user stories.

Quality Assurance:

The Product Owner must inspect the box to ensure it meets all the acceptance criteria outlined in the user stories.

Timebox Compliance:

The box must be completed within the allocated sprint time.

Team Agreement:

All team members must agree that the box meets these criteria.

Presentation Ready:

The box is ready to be presented in the final review.

Feedback Incorporated:

Any feedback from the previous sprint review must be incorporated.

Should a team meet all these criteria, then they can confidently say that the ProductBox is "Done". This ensures a high-quality output and aligns the team on what needs to be achieved for successful completion.
