

On the use of generative AI

- Do not to upload or copy/paste sensitive data into tools like ChatGPT.
- Disable training on your input data at work (Check the settings as this is likely to be turned on by default)
- Don't assume the output from a generative AIs will be accurate, always cross-check elsewhere.
- Generative AIs may produce content that is protected by copyright or other intellectual property rights. Cross-check elsewhere before using.
- Be wary, generative AIs can be echo chambers and validate your biases.
- Ultimately **you** are responsible for the output of whatever tool you use.
