Questions for Engineering Leadership

A cheat-sheet to help drive effective outcomes and facilitate inter-departmental communication.

Technology

- What's our current tech stack and why was it chosen?
- How do we stay updated with the latest technology trends?
- What are the biggest tech-debts we have, and what's the plan to address them?
- How are we addressing cybersecurity and data privacy?
- What is our disaster recovery and business continuity plan?
- How do we measure the performance and reliability of our technology?
- What's our strategy for scalability and are we poised for future growth?

Current Projects

- What are the key projects currently underway and what business objectives do they serve?
- How do you prioritise among projects?
- Who are the project stakeholders and how is their feedback incorporated?
- What challenges are you currently facing with these projects and how are you addressing them?
- How do we ensure projects are completed on time and within budget?
- What metrics are you using to evaluate project success and ROI?

Assessing Performance

- Are tech projects being completed on time and achieving their intended results?
- Is there a positive, innovative, and productive team culture?
- Are we meeting our resilience, performance and security targets?
- Is tech spending within budget and providing value?
